

2016

1. Structural variations of the first family of heterometallic uranyl carboxyphosphate assemblies by synergy between carboxyphosphate and imidazole ligands
Yang, W. T.; Wu, D.; Liu, C.; Pan, Q. J.; Sun, Z. M.
Cryst. Growth Des., 2016, *16*, 2011–2018.
2. Assemblies of metal-organic frameworks based on a tetrapodal linker for luminescence sensing of tetrahydrofuran
Gao, C. Y.; Wang, D.; Li, J. P.; Wang, Y.; Yang, W. T.
CrystEngComm, 2016, *18*, 2857-2863. (**Corresponding author**)

2015

3. Structural chemistry of uranium phosphonates,
Yang, W. T.; Parker, T. G.; Sun, Z. M.
Coord. Chem. Rev., 2015, *303*, 86-109.
4. Uranyl Carboxyphosphonates Derived from Hydrothermal in Situ Ligand Reaction: Syntheses, Structures, and Computational Investigations
Wu, D.; Bai, X. J.; Tian, H. R.; Yang, W. T.; Li, Z. W.; Huang, Q.; Du, S. Y.; Sun, Z. M.
Inorg. Chem., 2015, *54*, 8617-8624. (**Corresponding author**)

2014

5. Syntheses, Structures, Luminescence, and Photocatalytic Properties of a Series of Uranyl Coordination Polymers
Yang, W. T.; Tian, W. G.; Liu, X. X.; Wang, L.; Sun, Z. M.
Cryst. Growth Des., 2014, *14*, 5904-5911.
6. Structural Variation within Heterometallic Uranyl Hybrids Based on Flexible Alkyldiphosphonate Ligands
Yang, W. T.; Yi, F. Y.; Tian, T.; Tian, W. G.; Sun, Z. M.
Cryst. Growth Des., 2014, *14*, 1366-1374.
7. Isolation of a series of uranium organophosphinates
Yang, W. T.; Wang, H.; Du, Z. Y.; Tian, W. G.; Sun, Z. M.
CrystEngComm, 2014, *16*, 8073-8080.
8. The First Family of Actinide Carboxyphosphinates: Two- and Three-Dimensional Uranyl Coordination Polymers
Yang, W. T.; Wang, H.; Tian, W. G.; Li, J. Y.; Sun, Z. M.
Eur. J. Inorg. Chem. 2014, 5378-5384.

2013

9. MOF-76: from a luminescent probe to highly efficient U-VI sorption material
Yang, W. T.; Bai, Z. Q.; Shi, W. Q.; Yuan, L. Y.; Tian, T.; Chai, Z. F.; Wang, H.; Sun, Z.

M.

Chem. Commun., 2013, 49, 10415-10417.

10. Syntheses and Structures of a Series of Uranyl Phosphonates and Sulfonates: An Insight into Their Correlations and Discrepancies

Yang, W. T.; Tian, T.; Wu, H. Y.; Pan, Q. J.; Dang, S.; Sun, Z. M.

Inorg. Chem., 2013, 52, 2736-2743.

11. Synthesis, Structures, and Properties of Uranyl Hybrids Constructed by a Variety of Mono- and Polycarboxylic Acids

Yang, W. T.; Dang, S.; Wang, H.; Tian, T.; Pan, Q. J.; Sun, Z. M.

Inorg. Chem., 2013, 52, 12394-12402.

12. Flexible Diphosphonic Acids for the Isolation of Uranyl Hybrids with Heterometallic U-VI=O-Zn-II Cation-Cation Interactions

Tian, T.; Yang, W. T.; Wang, H.; Dang, S.; Sun, Z. M.

Inorg. Chem., 2013, 52 (15), 8288-8290. (Co-first author)

13. Syntheses and Structures of Uranyl Ethylenediphosphonates: From Layers to Elliptical Nanochannels

Tian, T.; Yang, W. T.; Wang, H.; Dang, S.; Pan, Q. J.; Sun, Z. M.

Inorg. Chem., 2013, 52 (12), 7100-7106. (Co-first author)

2012

14. Microwave-Assisted Modular Fabrication of Nanoscale Luminescent Metal-Organic Framework for Molecular Sensing

Yang, W. T.; Feng, J.; Zhang, H. J.

J. Mater. Chem., 2012, 22, 6819-6823.

15. From 1D Chain to 3D Framework Uranyl Diphosphonates: Syntheses, Crystal Structures, and Selective Ion Exchange

Yang, W. T.; Wu, H. Y.; Wang, R. X.; Pan, Q. J.; Sun, Z. M.; Zhang, H. J.

Inorg. Chem., 2012, 51, 11458-11465.

16. Construction of Three-Dimensional Cobalt(II)-Based Metal-Organic Frameworks by Synergy between Rigid and Semirigid Ligands

Yang, W. T.; Guo, M.; Yi, F. Y.; Sun, Z. M.

Cryst. Growth Des., 2012, 12, 5529-5534.

17. Facile and rapid fabrication of nanostructured lanthanide coordination polymers as selective luminescent probes in aqueous solution

Yang, W. T.; Feng, J.; Song, S. Y.; Zhang, H. J.

Chemphyschem, 2012, 13, 2734-2738.

2011

18. $(\text{NH}_4)_6\text{Mn}_3\text{B}_6\text{P}_9\text{O}_{36}(\text{OH})_3 \cdot 4\text{H}_2\text{O}$: A new open-framework manganese borophosphate synthesized by using boric acid flux method
Yang, W. T.; Li, J. Y.; Na, T. Y.; Xu, J.; Wang, L.; Yu, J. H.; Xu, R. R.
Dalton Trans., 2011, *40*, 2549-2554.

2009

19. Synthesis, structure and magnetic property of a new organo-templated mixed-valent iron(II, III) borophosphate
Yang, W. T.; Li, J. Y.; Pan, Q. H.; Xing, H. Z.; Chen, Y.; Yu, J. H.; Xu, R. R.
J. Mater. Chem. 2009, *19*, 4523-4528.

2008

20. $\text{Na}_2\text{VB}_3\text{P}_2\text{O}_{12}(\text{OH}) \cdot 2.92\text{-H}_2\text{O}$: A new open-framework vanadium borophosphate containing extra-large 16-ring pore openings and $12^8 16^6$ super cavities synthesized by using the boric acid flux method
Yang, W. T.; Li, J. Y.; Pan, Q. H.; Jin, Z.; Yu, J. H.; Xu, R. R.
Chem. Mater., 2008, *20*, 4900-4905.
